

Design guide

Jive Software customization specifications

Global Customizations

1: GLOBAL HEADER BACKGROUND

Use #333 background for top portion of the Global Header, and #5C5C5A for navigation background.

2: CUSTOM LOGO

3: CUSTOM LINKS

Add custom links to main Jive Software site, My Account, and Try Jive.

4: MOVE SEARCH

Move Search box to top portion of Global Header in order to make room in nav bar for custom navigation (#6).

5: USER NAME

Hide user name to ensure content fits within minimum browser width. Move left to accommodate search box.

6: CUSTOM NAVIGATION

Add custom navigation with mega drop-downs to Global Header.

7: ACTIVITY COUNT

Use orange (#EF831E) gradient for Activity counts.

8: CALL OUT BUTTONS

Change all call-to-action buttons to use orange (#EF831E) gradient. Use custom font, Antenna, for all buttons.

9: HEADLINES

Use custom font, Antenna, for headlines H1-H4.

Global Customizations (continued)

The screenshot shows the Jive Social Business interface with four numbered callouts highlighting customizations:

- 1: TABS**: The navigation tabs (Overview, All Places, Subspaces and Projects, Reports, Calendar, Manage) have a white background and white text.
- 2: POPOVER MENU HOVERS**: The popover menu for 'All Places' has an orange gradient background.
- 3: CUSTOM CONTENT STYLES**: Custom styles are applied to buttons like 'WRITE A BLOG POST', 'BLOG BEST PRACTICES', and 'TERMS & CONDITIONS'.
- 4: FEATURED PLACES WIDGET**: A horizontal rule is added between the 'External Community Managers' and 'Internal Community Managers' items in the 'FEATURED PLACES' widget.

1: TABS

Change background of tabs to use linen background texture. Change text color to white for tabs as well as Manage link. Use white icon instead of purple for Manage link.

2: POPOVER MENU HOVERS

Change pop-over menus to use orange (#EF831E) gradient instead of blue gradient.

3: CUSTOM CONTENT STYLES

Add custom styles for displaying groups of buttons.

4: FEATURED PLACES WIDGET

Add horizontal rule between Featured Places.

Business-level requirements

Business level requirements that go beyond default Theming Tool capabilities:

- Add custom meta description and google-site-verification code to header.
- Hide disabled user's profile page content, unless Admin. (Jive Community has a lot of spam accounts, this solution blocks spammers from leaving spam links in their profile page even after being disabled.)
- Add gamification to Profile page.
- Hide tabs and suppress links to JiveTalks blog page, redirect any links to this Space's Blog to the Space overview page.
- Custom navigation (see Global Header #6)
