Release Overview

Artemis Views Enterprise 2018.1 release is focused primarily on issues reported by customers.

➤ Release Version	Artemis Views Enterprise 2018.1
➤ Release Date	13 th April 2018
➤ Release Type	General Availability
➤ Deliverable	Product Release Software and Release Documentation

What's New in this Release

TrackView (new non-applet version)

In the new TrackView (non-applet version), project level security was implemented. This means that now each user is able to see only those projects which they are responsible for. This allows them to only get the information associated with the application security role assigned to them. Also, all reports now include totaling and subtotaling.

This non applet version of TrackView has been certified on two application servers: IIS + ServlerExec 6.0 and Tomcat 8.5.

Summary of Fixed Customer Issues

Fixes for the following reported issues have been included in this release.

ZendeskID	Issue ID	Summary

	VIEWSCID-7869	Mobile Time Entry - Clear Timesheet, Add, and Delete icons are Active When User Hoblely J.J. is Selected

Upgrade instructions

Application upgrade

Please read the document “AV_ClientServer_Installation_Manual.pdf” before commencing with the installation process. The installation manual can be found on the Views install CD at the following location:

\\Artemis ClientServer Components\Views Components\Docs\install

A notable update to the install manual is found in the CostView job server section. In particular, updates to the CostView job server parameter file (cvserver.ini) are described on pages 59 and 60. The updates are important to understand and implement because they impact all CostView job server instances, specifically job servers configured to support multiple datasets.

Database upgrade

Please read the document “dbchange.pdf” before commencing with the installation process. This document provides information on database script changes that impact this release. The document can be found on the Views install CD’s at the following location:

\\Artemis ClientServer Components\Views Components\Docs\readmes

Known Issues

- 1) [VIEWSCID-1527](#) - MSPClient - Global.mpt files for different languages to support MSP 2007.

Additional Information: Global.mpt files for all supported languages are now available for MSP 2007. Users can get these files from Installation disk

<CD Image>\Artemis ClientServer Components\Views MspClient\Miscellaneous\Global MPT\ and copy it to MSPClient installation folder (for example C:\Program Files\Artemis MspClient\).

Ex: English language global.mpt file for MSP 2007 can be downloaded from

<CD Image>\Artemis ClientServer Components\Views MspClient\Miscellaneous\Global MPT\Global EN\MSP 2007\.

- 2) [VIEWSCID-3022](#) - MSPC/BCE - Saving updated values unsuccessful and results in different values for %Complete and Remaining Duration in HAMMOCK activities between MSPC and BCE

Workaround: To obtain correct %Complete and Remaining Duration values for the in-progress Hammock activity when saved to ProjectView, you must run Time Scheduling.

- 3) [VIEWSCID-4118](#) - ProjectView - Changing Earned Value Method in a 1 to 1 project should be successful and the field should be editable provided the corresponding activity has not started.

Workaround: Issue can be resolved by deleting the activity and then adding it back.

- 4) [VIEWSCID-4142](#) - CostView, Security Manager - CostView crashes when Security Manager is left open and CostView is opened.

Workaround: Close Security Manager before running CostView.

Supported Platforms

Project View and Cost View

Platform	Version
Operating System	Windows 7 R2, Windows 8
.Net Framework	4.0
Database	Oracle 12c with 32 bit Oracle 11g client, SQL Server 2008, SQL Server 2012

Views Portal Platform

Platform	Version
Operating System	Windows 2012 R2 Server
JDK Version	1.8.0_92
Database	Oracle 12c, SQL Server 2012
Application Server	Tomcat 8, Tomcat 8.5
JDBC Drivers (Type 4)	Oracle JDBC native driver
Browser	IE11, Firefox ESR 31.5.0, Google Chrome

Views Process Management (VPM)

Platform	Version
Operating System	Windows 2012 R2 Server
JDK Version	1.7.0_51
Database	Oracle 12c, SQL Server 2012
Application Server	WebLogic 12.1.1(c)
JDBC Drivers (Type 4)	Oracle JDBC native driver
Browser	IE11, Firefox ESR 31.5.0

Artemis Project Management (APM)

Platform	Version
Operating System	Linux Red Hat Enterprise 6, Windows 2008 Server R2, Windows 2012 Server
JDK Version	1.7.0_51, 1.8.0_92
Database	Oracle 12c, SQL Server 2008, SQL Server 2012
Application Server	Weblogic 12.1.1(c), WebSphere 8.5.5.3, Tomcat 7, Tomcat 8.5, IIS7.5 with ServletExec 6.0
JDBC Drivers (Type 4)	Oracle JDBC native driver, SQL Server JDBC native driver
Browser	IE11, Firefox ESR 31.5.0, Google Chrome 40, Safari 6.2 (Mobile TrackView)
Report Export Format	Acrobat Reader 8.1 and 11, Microsoft Excel (macros is not supported) 2010 and 2013.

TrackView (Non Applet)

Platform	Version
Operating System	Linux Red Hat Enterprise 6, Windows 2008 Server R2, Windows 2012 Server
JDK Version	1.7.0_51, 1.8.0_92
Database	Oracle 12c, SQL Server 2008, SQL Server 2012

Application Server	Tomcat 7, Tomcat 8.5, IIS7.5 with ServletExec 6.0
JDBC Drivers (Type 4)	Oracle JDBC native driver, SQL Server JDBC native driver
Browser	IE11, Firefox ESR 31.5.0, Google Chrome 40, Safari 6.2

MSP Client

Platform	Version
Operating System	Windows 7 R2, Windows 8
.Net Framework	4.0
Integration	MSP 2007 (32-bit)

Job Server

Platform	Version
Operating System	Windows 2008 Server R2
